Career Objective
ML Engineer passionate about AI solutions, with experience in training and evaluating ML models for classification & regression.

Skills
• Python, Pandas, Scikit-learn
• Deep Learning, CNN, Autoencoders
• EDA, Statistical modeling

Projects
1. Customer Churn Prediction
Achieved 92% accuracy using Random Forest + Hyperparameter tuning.

2. Image Noise Removal using Autoencoders
Implemented custom deep autoencoder architecture.

Education
B.Tech AI & ML – 8.9 CGPA
